of School Days: 100

Student: Jonny Bodden

Subject/Curriculum	Grade Level	Academic Grade	Comments
MATH – Pre Algebra Teaching Textbooks	8	90%	Jonny is quickly working his way through this online Pre-Algebra course, with very little need of help from the teacher. He grasps concepts and is able to apply them to the various practice questions. If a new topic is confusing to him, he will ask for help, and once he understands it he will independently complete all practice questions.
SCIENCE Apologia Physical Science	7	A	Through tests, hands-on experiments, and written reports, Jonny demonstrates he understands the material presented and discussed. He is an active participant in his online class.
LANGUAGE ARTS Institute for the Excellence of Writing (IEW)	7	95%	Jonny continues to practice writing 5 paragraph essays. Formats have included persuasive, informative, and interviews. He requires some help to complete each paragraph, but is attempting to become more competent to complete these independently.
SPELLING All About Spelling	7	B	Weekly spelling lessons are helping to improve Jonny spelling. When he remembers to look over his work, he can often catch and correct his own mistakes. This is a goal for next semester – to always read over written work before it is handed in.

GEOGRAPHY Geography Matters	7	96%	Thus far this course has covered North America, South America, Central America, Europe and Africa. Jonny excels in memorizing the location of countries on a map. His written projects have been very good and he has learned about physical geography, the business economy in different countries, and animals that live in various areas of the world. Next semester will focus on Asia, Australia and Antarctica.
PHYS ED FBCS Gym Program	7	A	A 6 week program with FBCS gave opportunity for Jonny to learn the rules of many team sports, and play with a group of other homeschool children. He was an avid participant.
