

Tyler Ebanks

Grade 6

Mid Year Report 2019-2020

108 Days of School

Math

Tyler is working through Teaching Textbooks, Grade 6. Every 10 lessons he is given a test. At this point in the year, his test grades average 85%. He is doing very well.

Science

Following Apologia's Anatomy and Physiology curriculum, Tyler has studied the digestive system, respiratory system, cardiovascular system, and the skin. Recently, we visited St. Matthew's Medical School on a field trip, and Dr. Ochoa showed parts of the human body, and discussed microbiology.

Tyler has also taken a course to learn to program his Sphero BB-8 and is very good at completing challenges given to him. He has good perseverance.

Recently, he has researched how to make an electric motor, and we will try to build one during the second half of our school year.

Language Arts

Tyler reads a chapter of his assigned book daily, and his reading continues to grow and improve. He is working on his speed, while still retaining the information read.

Daily cursive practice is given, as well as writing assignments. Tyler researched and completed an essay on the Space Station. Every week he writes a journal entry. Once he completes an assignment, he then goes back and proof reads it to make corrections before turning it in.

Growing with Grammar is the grammar curriculum Tyler follows. He has daily grammar lessons and assignments in his workbook. Although this is not his favourite, he is becoming adept at spotting and correcting grammar errors. He also uses Editor in Chief, which presents students with a written essay, and students must find grammatical errors. He enjoys this exercise.

History

The Mystery of History is the history curriculum we use. We have learned about the ancient city of Nineveh, the Assyrians, the Babylonians, and many other nations.

Art

Art is incorporated into all other areas of study.

Physical Education

Tyler is enrolled in roller hockey, and has practices and games weekly. He also enjoys other activities, including playing outside on his scooter, swimming, etc.
